

Local partners

What is the role of the Local Partner in the Acorn onboarding process

There are several application steps to complete via our online portal or other channels

Local Partner and Project onboarding process

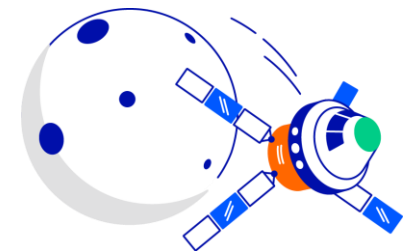

- Via Portal
- Via meetings or fieldwork
- No involvement from Local Partner

Ground truth data collection

Requirements

Ground truth data collection

- Paid for by Acorn
- Carried out by local partner or contracted third party
- Facilitated by local partner
- LiDAR related tasks (if applicable)

Ground Truth Data Collection

1.Land-property: entire land-property of the farmer (including roads, houses, timber lots, etc.)

2.Plot: A polygon figure with straight sides defined by GPS coordinates of the farmland/cultivated land.

- Size between 0,1 Ha and 10 Ha of farmland/cultivated land
- Collected during farmer onboarding data collection, incl. polygon collection

3.Sampling Plot: Plot of 100x100m (1 ha) in the middle of the plot. If not possible, establish a plot of 50x200m or 200x50m.

4.Sample subplot: Subplot of 25x25m located within the sampling plot. Collected during ground truth.

Recurring

- Register new farmers
- Update polygons and farmer data (e.g. phone numbers) if needed
- Additional GT collection following years
- Project councils
- Farmer payments
- Farmer surveys
- Monitoring and reporting on project council
- (Potential validation and verification)
- Recurring CDD reviews
- Requirements related to financing if applicable – financial reporting etc.

An aerial photograph of a lush tropical forest. The forest is composed of various green trees and plants. In the upper center, there is a small clearing with a wooden hut and a white vehicle. To the right, there is a larger white building with a blue roof. The text "Thank you!" is overlaid on the left side of the image.

Thank you!
