1. INTRODUCTION TO SERIOUS SHEA & THE GREAT GREEN WALL

01

Since 2007 Africa has been united in building the Great Green Wall — an 8,000 kilometer strip of reforested land across the continent from Senegal to Djibouti and the biggest living natural wonder in the world. The initiative is planting trees along this 3 million km2, semi-arid ecological transition zone, called the Sahel, to act as a buffer to prevent the Sahara Desert from expanding south. Combating desertification and land degradation will enable the local people to work their lands, providing food security, jobs, and a reason to stay for the millions who live along this tree wall. Within the Sahel Region, the Great Green Wall Initiative is initially focusing on the most urgent areas that are at highest risk of desertification or have the highest potential for preventing the spread of desertification while at the same time improving conditions for the local communities.

A decade since starting The Great Green Wall initiative is only 15% underway. Support from within Africa and the World is urgent for climate resilience, for nature and for communities. The transition to clean energy is critical so the trees planted do not end up as charcoal from burning wood fuel for food processing and in kitchens and so added value processing remains in the region to boost the rural economy with action to protect the native forests.

02

The Great Green Wall Regeneration, Deforestation-free, Zero-carbon Value Chain Business Model as proposed by Serious Shea Senegal, won the United Nations and World Economic Forum endorsed TRILLION TREES SAHEL and GREAT GREEN WALL CHALLENGE in 2021 as a TOP INNOVATOR which is leading the way. After 2 years of feasibility studies, technical preparations, and building linkages between the private sector, local communities, the public sector and international investors, Serious Shea has launched its Great Green Wall Challenge starting from Senegal in the western most part of the Sahel.

Serious Shea Senegal's innovative approach is:

- Science based
- Socially inclusive
- Partnership based
- Built on local skills development;
- Well managed with people and technology.

Management technologies include clean energy processing, Circular Economy waste recycling for biogas and soil conditioners, soil water retention gels, QR coded supply chain, planet.org/nicfi satellite land-use & carbon information, drone data verification, Chain Zy (aka Blockchain) time stamp so financial and ESG information cannot be altered.

Population: 18 million people
Area: 196712 km2 (@20 M ha)
Climate: Aw Tropical savanna - Bsh Warm semi-arid - Bwh Warm dessert
GDP: US\$ 27.7 Billion
Employment: 60%+ Food Crop Production
(World Bank Statistics @ latest available date) Rural Energy Access 38% UN SE4all-africa.org

The current reliance of wood fuel in rural communities is such that e.g. 20kg wood are used for every 1kg of shea butter processed from shea fruit and nut collection.

2. INVESTMENT PITCH DECK

PLANTATIONS & DEFORESTATION FREE ZERO-CARBON AGRI-FOOD VALUE CHAIN

Activities

Nurseries & Native Forest Plantations

Clean Energy Processing for shea butter, dried mangoes,
baobab & moringa powder and oils

Profile

€ 25 M investment

€ 50 M pa. revenues Year 10;

40% Carbon Pre-payments; 60% Debt

3. FINANCE AND MARKETING THROUGH PARTNERS

Financing Partners

- 40% Carbon Pre-payments (Equity); 60% Debt; 2% Business and Industry (carbon offsets) Project Finance Phase 1.

Agri-food value chain partners

Customers

- Business and Industry (carbon offsets)
- Imisk food distribution channels
- Natural cosmetics (L'Occitane, Body Shop and other cosmetics groups through existing market relations and surveys by Agritech Group & Serious Shea Burkina Faso)

Target Audiences

- Certified Carbon Offsets Worldwide
- Heath Foods (bulk for retail) Middle East, US, Europe
- Shea butter and oils (bulk for retail) Middle East, US, Europe

80% SHARES; GOLDEN ORGANICS GLOBAL; BLENDED FUND MANAGER

William Kwende, CEO Golden Organics & Serious Shea Executive Chairman is also Founder & CEO of Agritech Group which has organized the collection of shea nuts and other African commodities for the major international markets in Europe and Asia since 2010 (e,g 5-10 000 T /year shea nuts). Agritech Group has processed and exported shea butter for several years, produced and planted millions of trees in arid lands, and successfully certified a carbon generating project. William has a masters in Business Planning from Quantic School of Business and Technology, and was co author of the Serious Shea Project which won the WEF-Uplink 1t.org Sahel and Great Green Wall Challenge in 2021. William has since played a major international role to advance the GGW initiative including at DAVOS 2022, with the African Union, the European Parliament, the UNFCCC and with public and private investors.

20% SHARES; SENEGAL WOMEN’S & YOUTH GROUP COMMUNITY FUND DELIVERED THROUGH COOPERATIVE INSTRUMENTS
